101	Hotel California	Such a lovely face. Plenty of room at the Hotel California.	yash.saboo@gmail.com
102	Riptide	I was scared of dentists and the dark. I was scared of pretty girls and starting conversations	rishabh.kaushick@gmail.com
103	I Like Me Better	I like me better when I am with you I dont know what it is but I got that feeling	neha.yadav@gmail.com
104	Come and See Me	Things change, people change, feelings change too. Never thought the circumstances woulda changed you	afnaan.rafique@gmail.com
105	Wonderwall	Because maybe, you are gonna be the one that saves me. And after all, you are my wonderwall	rajeshwar.singh@gmail.com
106	Piano Man	Sing us a song tonight. Well we are all in the mood for a melody. And you have got us feeling alright	yamini.gahlot@gmail.com

Module 1: Registration

- Allows to register new users. Without registering in the website, people will not be allowed access to the contents of the website.
- This module will read the following input from the user:
 - Name
 - Email Address
 - Password
- Assumption: user must have an email account.

Design Class for Registration

- Controller: SignUpController
- DAO: SignUpValidate
 ISignUpValidate
- DTO: User

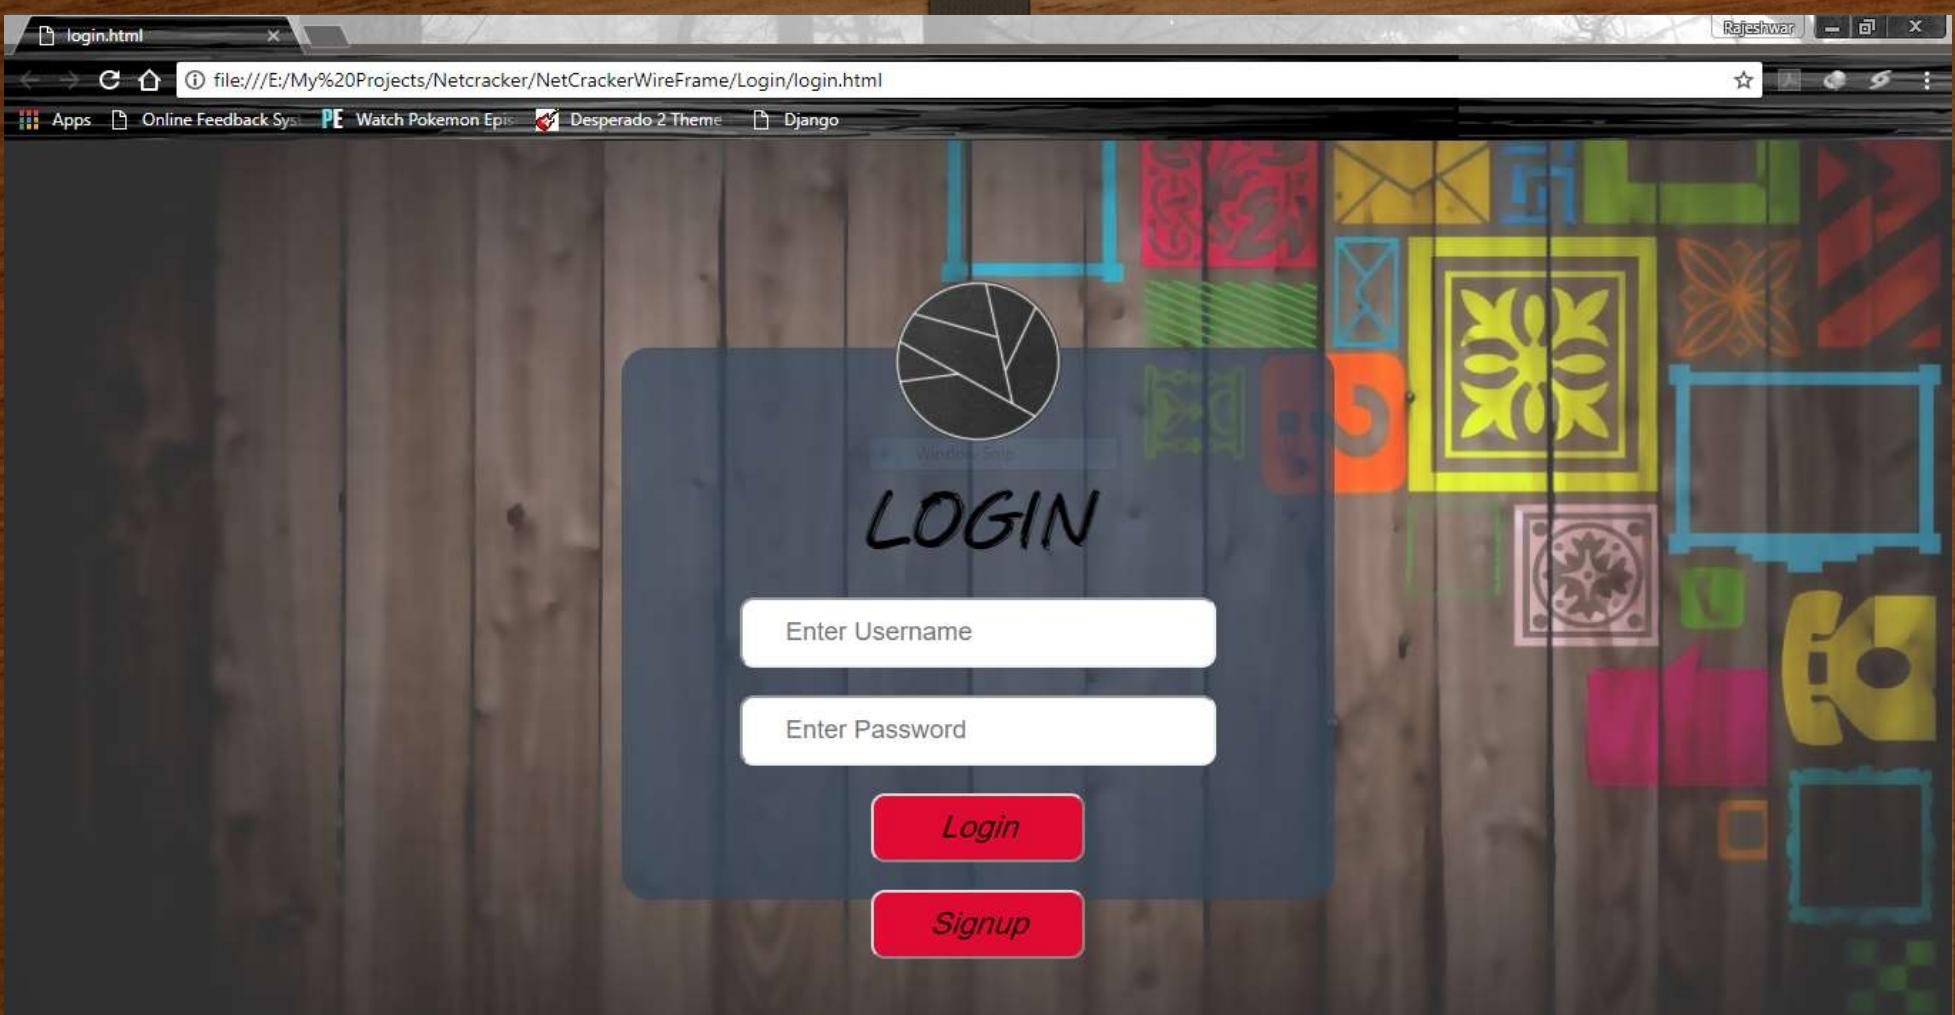

Module 2: Login

- First webpage that would be displayed to the user
- 'Sign Up' button for unregistered Users.
- Login credentials will be validated from the database from the 'User' table.

Design Class for Login

- Controller: FrontController
- DAO: LoginValidate
- DTO: User

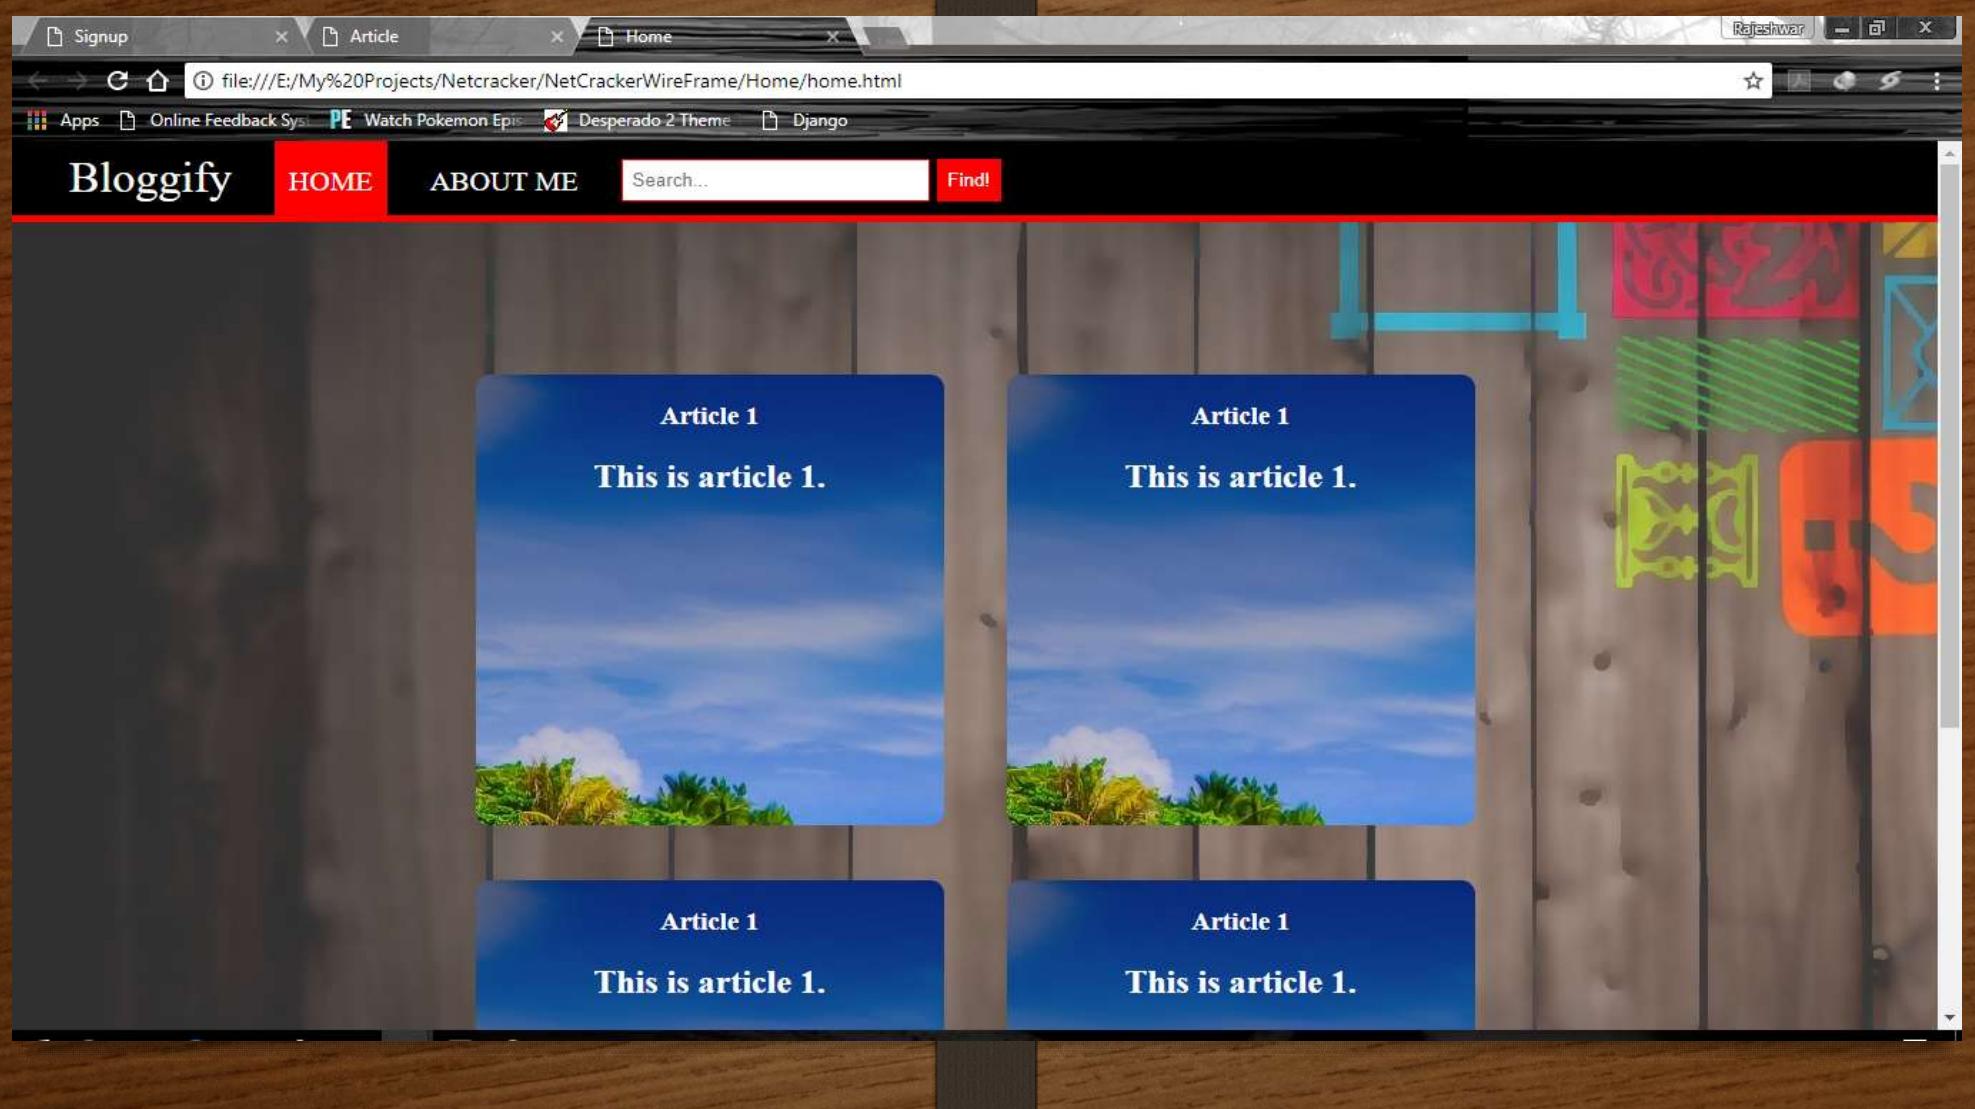

Module 3: Home Page

- The first thing a user should see when logged in to a blogging website is Blogs!
- Homepage is the first view of the web application when the user logs in. It will showcase multiple articles based on multiple domains that are viewable by all logged-in users. They will be retrieved from the database from the Article table shown below. It will also have the search and profile feature that can be used when needed.

Design Class for Home Page

- Controller: FrontController
- DTO: User
- DAO: ArticleList
IArticleList
- Service: ArticleService

Module 4: Profile

- User's Basic Information is displayed.
- Provides option to add an article under that profile.

Design Class for Profile

- Controller: FrontController
- DTO: User
- DAO: UserData
 IUserData
- Service: UserDataService

Claps count : 707

Article 1: This is link to article.

Article 2: This is link to article.

Article 3: This is link to article.

Article 4: This is link to article.

Module 5: Post

- To post a new article
- Implements tagging behavior by providing functionality to all registered users to post articles under provided categories (one category at max).
- These articles are entered into the database category wise and accessed when another user attempts to search them through the search module.

Design Class for Post

- Controller: FrontController
- DTO: User
- DAO: NewPost
INewPost
- Service: NewPostService

Causes of Bacterial Vaginosis - Debunking the Myths

Biology|Prateek Sharma

There are a few things that you can do to ensure that this is healed properly, but first, you should know what this is, and you should know what are the root causes overall. Without knowing the deeper elements associated with vaginosis, you will not be able to clear things up properly.

The Basic Information on Bacterial Vaginosis

The first thing that you should know about vaginosis is that there are symptoms that do not come through at first. That's right, you may have a bacterial change, and will not feel or see any symptoms. In that regard, you'll need to understand the symptoms associated with this. This includes vaginal discharge, itching, odor, and even pain during sex. These things do not go away without addressing the pH balance of the vagina. With a bacterial overgrowth, the pH levels are going to be hard to deal with overall.

Debunking The Myths of Vaginosis

There are a lot of different reasons why you may face off against bacterial vaginosis. However, there are some myths that people seem to believe about it. Do not fall into the trap of believing these main issues, as they are not associated with contracting vaginosis, and can send you down the wrong path of diagnosis.

Swimming Pools

Women may want to avoid swimming pools, since they think it can lead to vaginosis. The truth of the matter is simple, there is no link between bacterial overgrowth in the vagina and swimming pools or spas. These are not root causes to the issue, and should not be something of concern at all.

As you can see, there are a lot of different myths associated with vaginosis. These issues are not going to manifest if you partake in any of the activities or areas listed above. They are not risk factorsPsychology Articles, and will not cause vaginosis overall.
